

2009 03 10 --Thanks to all of you who have written to the Senate of Canada. Our paddling community is having an impact on the debate about the passage of the Budget Implementation Act. To understand how important your letters are to our Senators please read the **Hansard Records** from last week. The AWA has transcribed and edited the important sections of that days proceedings that relate to the NWPA to see how important our voices are.

If you haven't written yet to the Senate now is the last chance you have to get your opinion on record that might affect this important decision. If you thought your letter would be little more than f..t in the wind then think again because this tide can still be turned, but it takes all of us. So write now.

Thanks Again,
Chuck Lee
Director of Facilities and Environment
